Masoneilan

a Baker Hughes business

Masoneilan valve technology has helped customers maintain smooth operations for more than 100 years, with innovative products designed to optimize performance, reduce noise and vibration, and handle challenging conditions.

Consolidated

a Baker Hughes business

Consolidated provides a full range of safety relief valve styles, sizes, options and configurations.

From spring-actuated to pilot-operated, each pressure relief valve is configured to offer safe and efficient process flow control in challenging overpressure applications.

CONTROL VALVE

SERVICE & SUPPORT

- 80 000 square feet production facilities
- Factory certified field technicians
- Customized customer training
- Valve management
- Mobile service units
- Performance testing
- Engineering support
- Green Tag Center and Masoneilan Authorized Repair Centre
- ValvKeep online asset management tool
- EVT PRO safety testing
- ValScope control valve diagnostics

ValvKeep: One of the most powerful asset management tools on the market

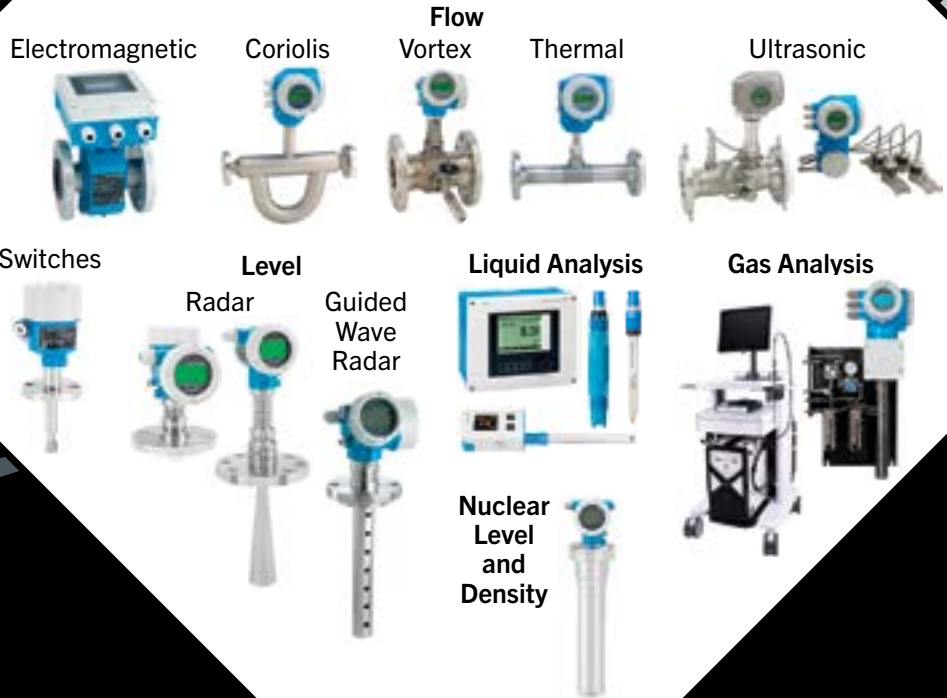

The ValvKeep tool is an intuitive, easy-to-use software program that records the life events of your valves, providing status reports on valve health, future maintenance planning, and other resource-maximizing functions.

- ValvKeep software can handle any valve in your plant
- Simplifies maintenance and the data management
- Aids in parts management and spare parts

Endress+Hauser

Endress+Hauser is a global leader in measurement instrumentation. They provide comprehensive process solutions for flow, level, pressure, analytics, temperature, recording, and digital communications.

INTEGRATION

Contro Valve offers a full range of integrated solutions for process instrumentation, fixed gas detection and environmental monitoring systems.

Through its team of experienced integration specialists, Contro Valve can provide all the services required to ensure a successful integration project, including:

- Selection of the main integration instruments
- Detailed design and shop assembly drawings both in 2D and 3D (Autocad & Solidworks)
- Specification and procurement of all required components and materials
- Shop assembly
 - Operating manuals
 - Pre-operational testing and quality control
 - Commissioning and training

OUR OTHER LINES

Flowserve is a global leader in manufacturing for comprehensive flow control systems.

Atomac Actuators

Lined Ball Valves

Durco Valves

Plug Valves

Worcester Controls

Ball Valves

Automax Valves

Pneumatic Actuators

Limitorque Actuation Systems

Actuators

Bronze Safety Relief Valves

Safety and safety relief valves. ASME Sections I, IV and VIII. Brass, bronze, cast iron, carbon steel and stainless steel bodies. Available in inlet sizes 1/4" through 6". Certified for steam, air/gas, and liquid service with set pressures up to 900 psi.

Jogler magnetic level gauges are a safe, economical way to measure and control level through a wide range of process pressures, temperatures, and fluids. Each component (chamber, float, and indicator) has been engineered to improve on existing designs to ensure reliable, maintenance-free operation right out of the crate.

Magnetic Level Gauges

- **ABZ** Valves
- **Becker** Regulators, Actuators and Valves
- **Galvanic** Analysis Measurement
- **McCrometer** Flow Metering
- **Mooney** Regulators
- **NAF** Control Valves
- **Precision Digital** Panel Meters
- ...and more !

ABOUT US

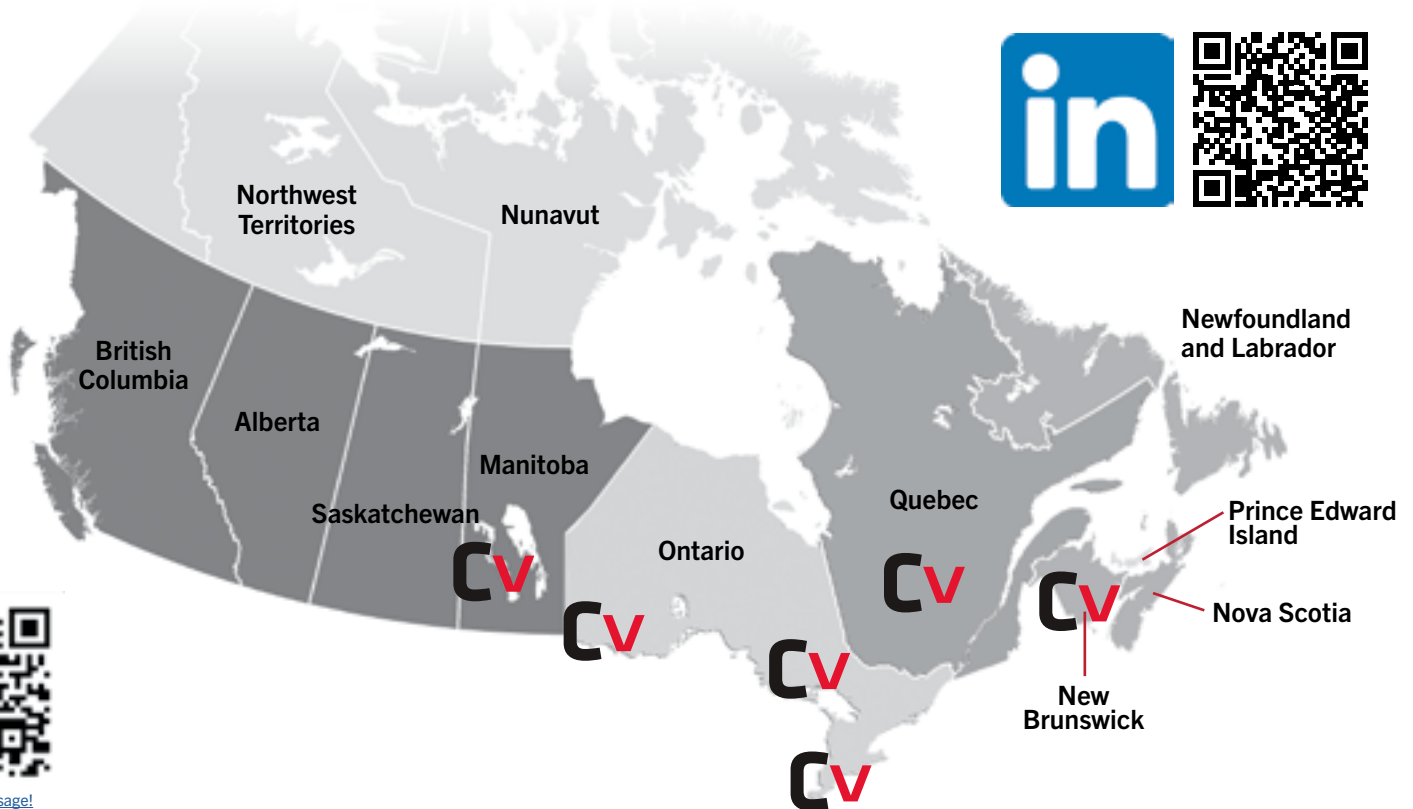

Since 1977, Contro Valve has been the leading provider of valves and instrumentation solutions in eastern Canada, serving industrial, commercial, and institutional customers. Our expertise spans various industries, including power generation, natural gas, pulp and paper, water treatment, refinery and chemicals, mining and metals, and many more.

Contro Valve is a full-service valve assembly, instrumentation and repair company. We represent over 20 manufacturers, covering a wide range of industrial applications.

Our success is built on leveraging the extensive technical expertise of the manufacturers that we represent, providing custom solutions tailored to the specific requirements of each customer application.
